

# Lean Process Mapping

## Streamline Your Way to Better Performance

According to Lean Six Sigma practitioners, approximately 50% of all business activity is waste. Lean Process Mapping enables you to visualize your operations and workflows in order to identify and eliminate costly waste. This allows you to optimize your operations, giving your people the capacity to focus on value creation.

## ReSource Pro Lean Process Mapping

ReSource Pro will work with your teams to facilitate a mapping process that both captures your current state and creates a future state plan that includes the cost of your most critical processes and how they can be reduced. By optimizing those processes, you'll be able to generate an ROI through newly created efficiencies.

## What We Do

We build on our extensive Lean Process Mapping experience and customize the process to fit your needs.

### 1. PRIORITIES

Together, we'll work with you to identify and quantify your most pressing issues.

### 2. CURRENT STATE

Map and quantify the current state of the identified processes.

### 3. FUTURE STATE

Here we'll define what better looks like, including quantifying the bottom line benefit you'll achieve.

### 4. IMPROVEMENT

We'll prioritize improvements and map out a plan for implementation.

### Here's Why It Makes Business Sense

**IMPROVED RESOURCE UTILIZATION** – by introducing standardization into every layer of the process, everyone in the organization is working from the same playbook, and knows who does what and when.

**INCREASED EFFICIENCIES** – through streamlining and reducing things like unnecessary steps and handoffs, we'll introduce the most efficient way to get things done.

**ELEVATED CUSTOMER EXPERIENCE** – by ensuring consistency, having faster turnaround times, and improved quality, your customers are the ultimate beneficiaries. This, in turn, increases their satisfaction, loyalty, and renewals.

### Operations Advisory Modules

Operations are the foundation of your business. And are often the single greatest influencer on your productivity, service performance and profitability. It's time to get strategic about operations and realize the exponential value.

### Experience You Can Count On

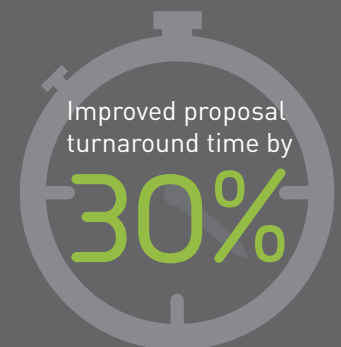

**20-30%**

Average improvement to the cost of a specific process

**50%**

reduction on marketing expenses for renewals based on improved process

Improved proposal turnaround time by

**30%**
